

X_TRADER® 7

The Next Generation in Futures Trading

Accuracy. Stability. Speed.

These are the hallmarks of the X_TRADER platform from Trading Technologies (TT).

TT pioneered the development of electronic derivatives trading. Loaded with innovative features, supremely reliable and reflex-fast, TT's X_TRADER platform is the front-end screen of choice for professional derivatives traders around the world. In fact, TT estimates that over 50 percent of the combined electronic volume on the world's six leading derivatives exchanges moves through the X_TRADER platform.

TT provides connectivity to the primary derivatives exchanges through the world's major global clearing firms. As a futures trader, you can use the X_TRADER platform to trade derivatives in virtually any market.

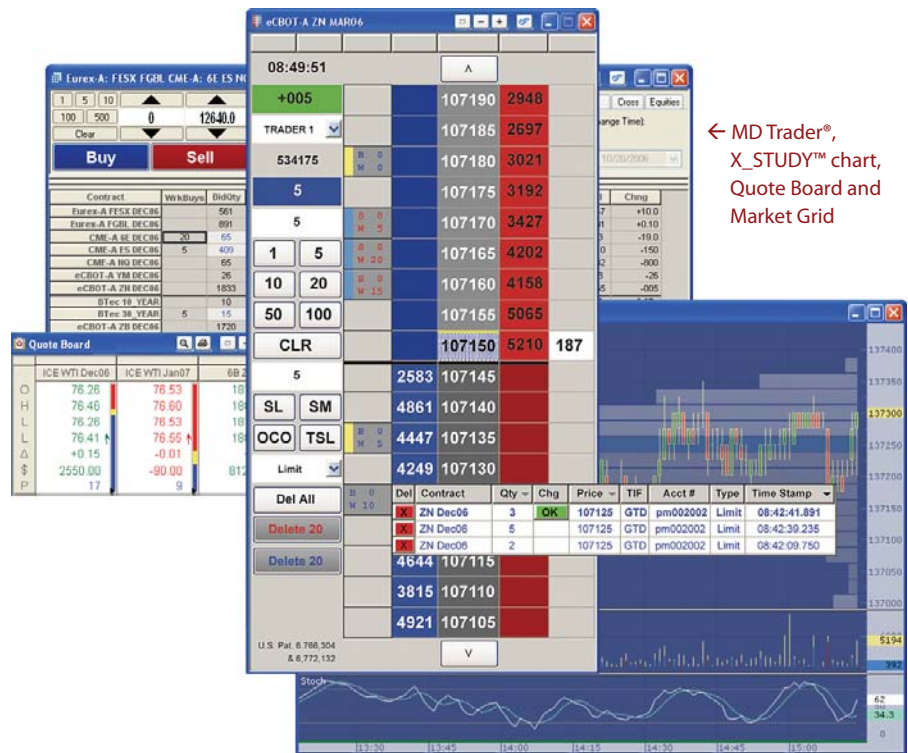

Some of the world's most successful traders depend on X_TRADER to manage their trades. Do they know something you don't know?

See what you've been missing. Contact a Trading Technologies representative and harness the extreme performance of X_TRADER.

The World's Most Powerful Trading Tool is Now Better Than Ever

The X_TRADER tool set has always given professional derivatives traders the edge with superior speed, stability and accuracy. Now X_TRADER 7 delivers even more speed, more exchange connections and more powerful tools to further optimize your trading performance.

- **Faster than ever:** Significant speed enhancements make this generation of X_TRADER even faster than before. Price updates are more rapid and more granular, automated tools react more quickly and order entry time is shorter. X_TRADER 7 also provides much faster fill downloads to improve speed and scalability for large multi-trader sites.
- **New exchange connections:** X_TRADER 7 gives you access to more exchanges and more products, including BrokerTec and Sydney Futures Exchange, with more to come.
- **More order types:** X_TRADER 7 supports multiple order types, including Stop Markets and Stop Limits with trigger quantities, timed orders, Market on Open (MOO), Market if Touched (MIT), Limit if Touched (LIT), Trailing Stops (TSL/TSM) and OCOs.
- **More powerful tools:** X_TRADER 7 provides integrated charting with X_STUDY™. Major enhancements to MD Trader® include the ability to configure MD Trader windows globally, faster quantity adjustments, Excel®-driven default quantities and "Laser lines", and exchange accurate volume at price. MD Trader also provides the ability to convert Treasury prices to yield and view Position in Queue (PIQ) on working orders. Autospreader additions include the ability to freeze and unfreeze working orders, adjust payout ticks on the fly, create ratio spreads and display spread prices in fractions and yield. X_TRADER 7 also includes new tools such as an innovative Quote Board, a new Floating Order Book and automated start of day functionality to carry positions within X_TRADER.
